Social Interaction

Overview

- Being social
- Face to face conversations
- Remote conversations
- Tele-presence
- Co-presence
- Shareable technologies

Being social

- Are F2F conversations being superseded by our social media interactions?
- How many friends do you have on Facebook, LinkedIn,etc vs real life?
- How much overlap?
- How are the ways we live and interact with one another changing?
- Are the established rules and etiquette still applicable to online and offline?

Conversational rules

Turn-taking used to coordinate conversation

- A: Shall we meet at 8?
- B: Um, can we meet a bit later?
- A: Shall we meet at 8?
- B: Wow, look at him?
- A: Yes what a funny hairdo!
- B: Um, can we meet a bit later?

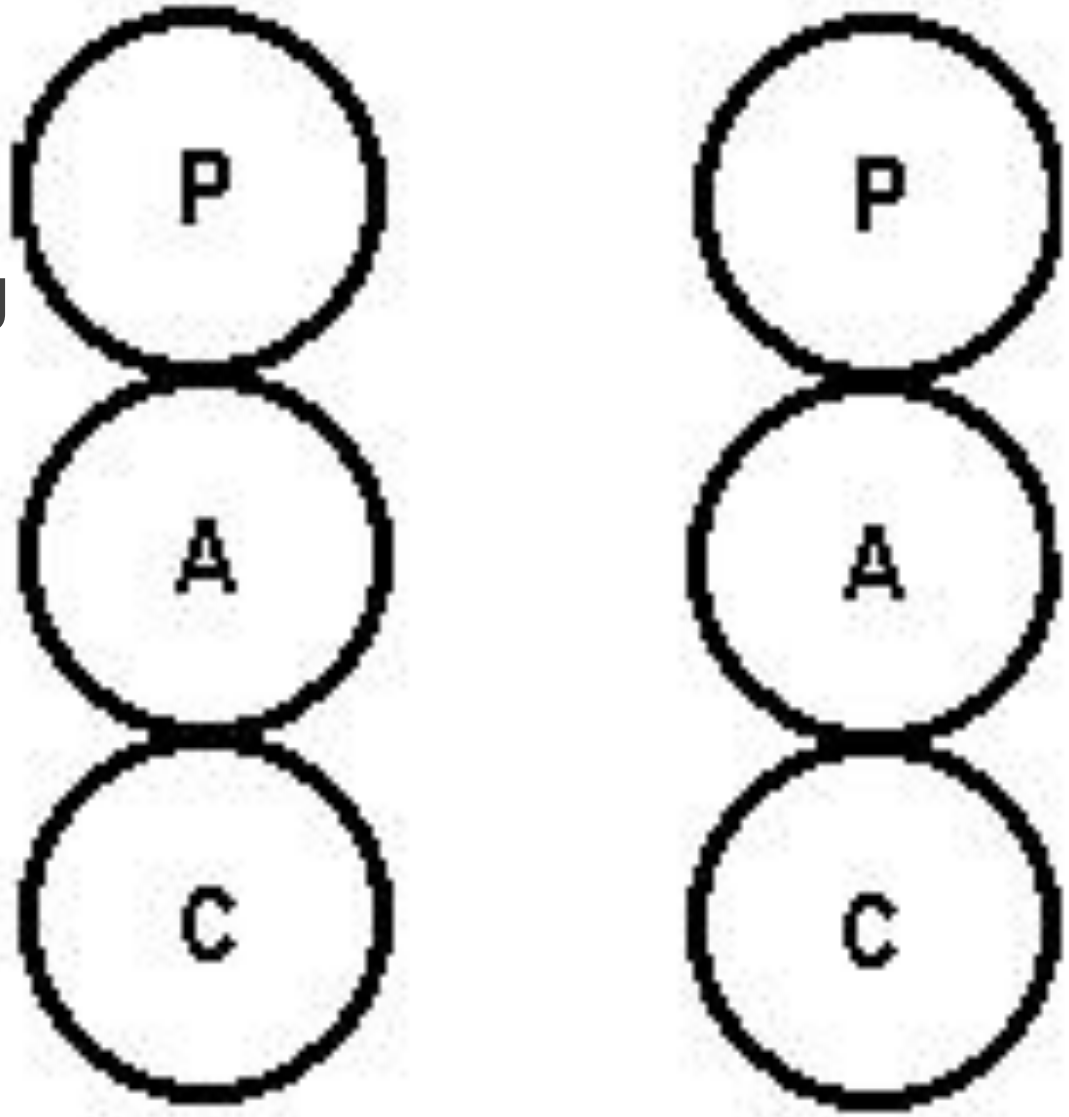

Back channelling to signal to continue and following

- Uh-uh, umm, ahh

Transactional Analysis

Nurturing
Or
controlling

Adapted
Or
natural

What happens in social media conversations?

Do same conversational rules apply?

Are there more breakdowns?

How do people repair them for:

- Phone?
- Email?
- Instant messaging?
- Texting?
- Skyping?

Remote conversations

- Much research on how to support conversations when people are ‘at a distance’ from each other
- Many applications have been developed
  - e.g., email, videoconferencing, videophones, instant messaging, chatrooms
- Do they mimic or move beyond existing ways of conversing?

Videophone

Hypermirror (Morikawa and Maesako, 1998)

- allows people to feel as if they are in the same virtual place even though in physically different spaces

People in different places are superimposed on the same screen to make them appear as if in same space

(woman in white sweater is in a different room to the other three)

Creating personal space in Hypermirror

2) Two in this room are invading the ‘virtual’ personal space of the other person by appearing to be physically on top of woman in white sweater

3) Two in the room move apart to allow person in other space more ‘virtual’ personal space

Everyone happy

Sococo – shows who is where and who is meeting with whom

Summary

- Social mechanisms, like turn-taking, conventions, etc., enable us to collaborate and coordinate our activities
- Keeping aware of what others are doing and letting others know what you are doing are important aspects of collaborative working and socialising
- Many technologies systems have been built to support telepresence and co-presence

Exercise

- Change the recepie
  - Make the recepie social
  - Maybe divide tasks to different persons
  - Maybe say dinner is ready
  - Maybe send a shopping list
  - Maybe ask for comments or changes
  - .....

Test the system

- Don’t forget to specify your target
- Set the sitution
  - like are friends gathered?, wher?, how many?, when? How long?
- Prepare the test

- As testers: perform the test as specfied
- Giv feedback and suggestions for improvements
