interaction

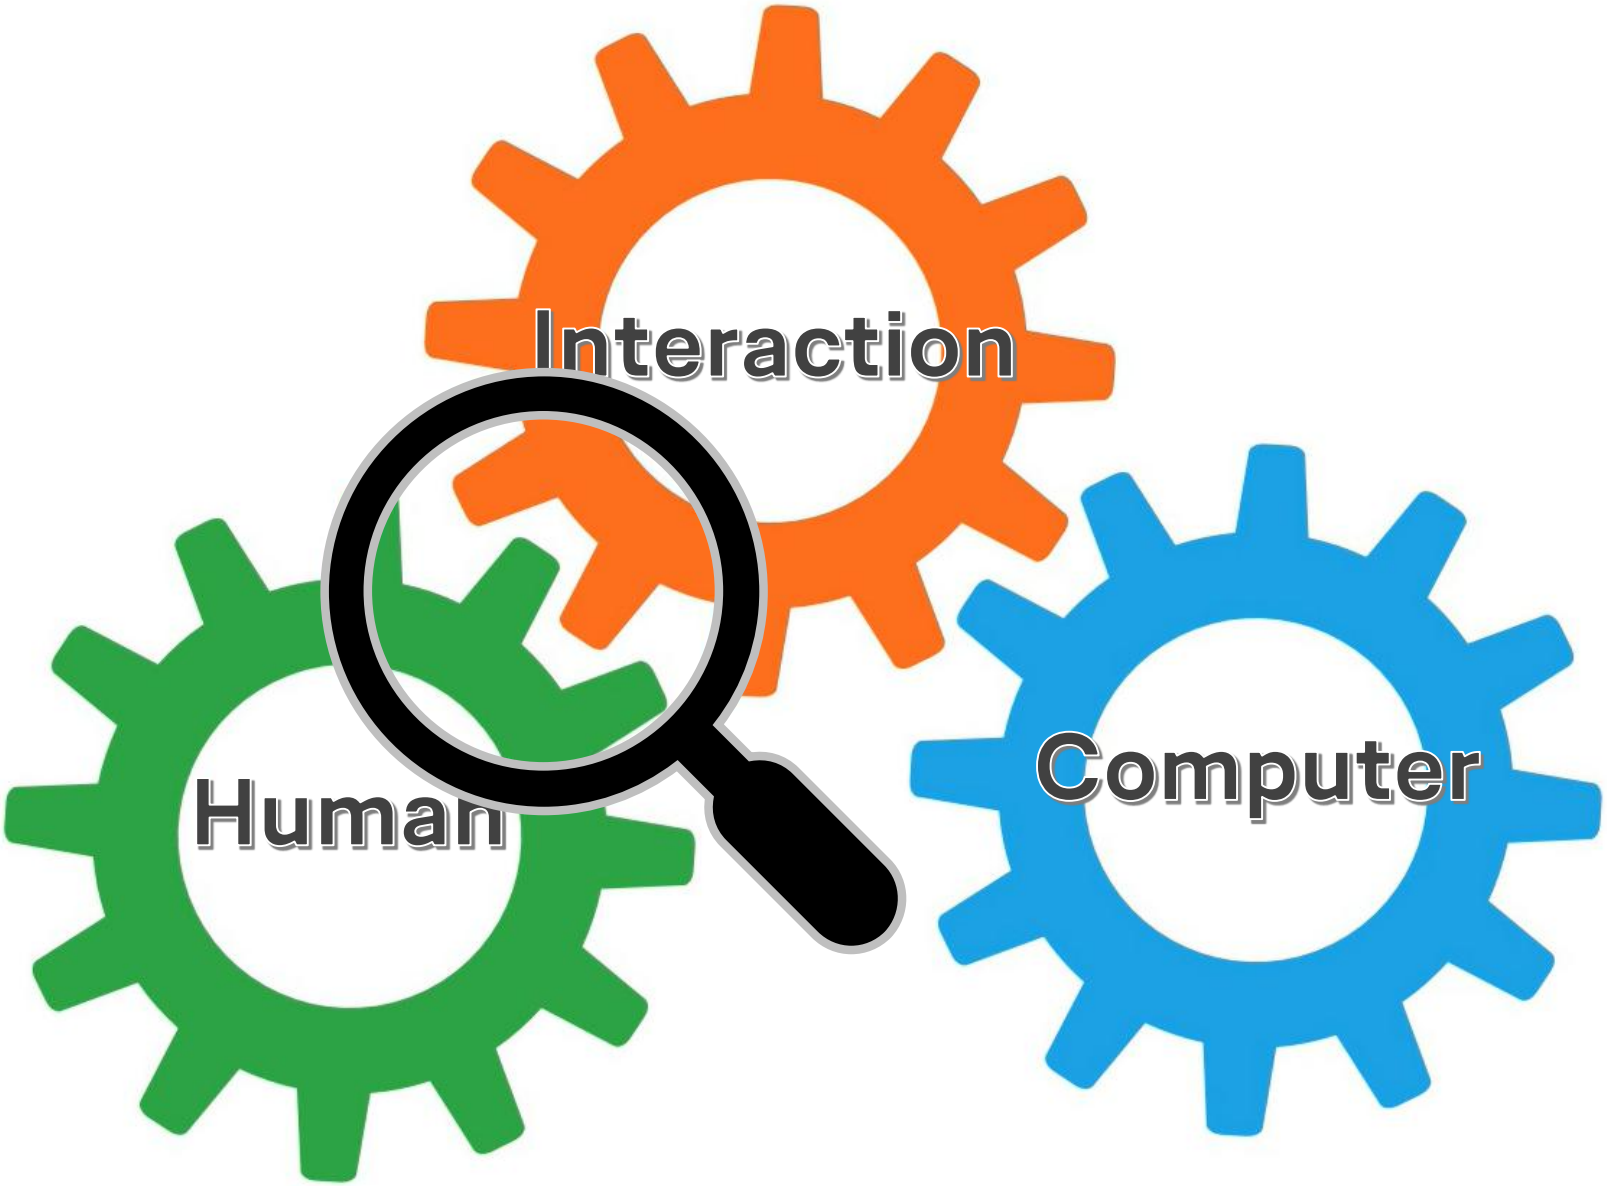

noun [C or U] • **UK** /ˌɪn.təˈræk.ʃᵊn/ **US** /ˌɪn.t̬əˈræk.ʃᵊn/

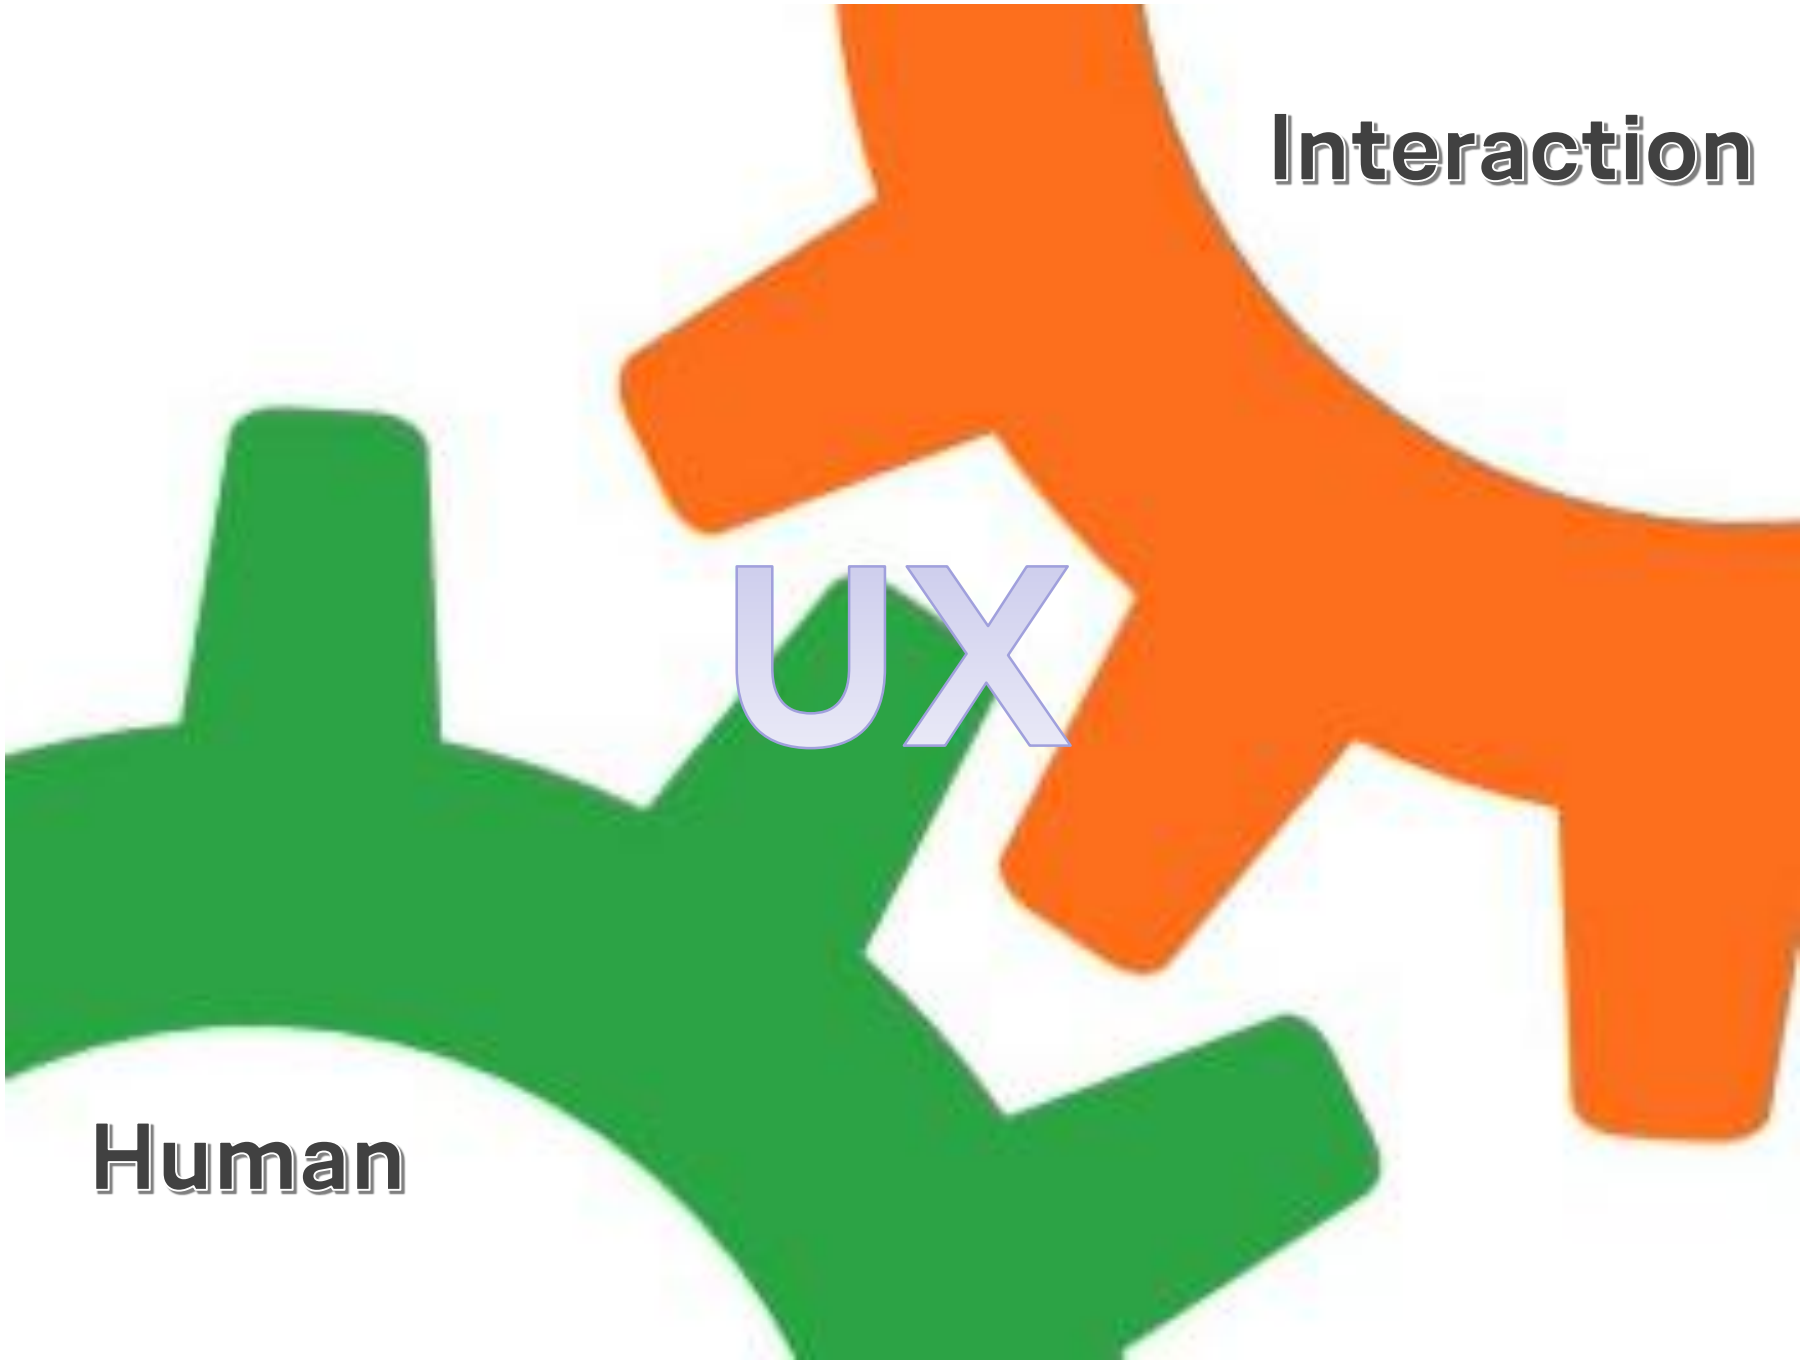

C1 **an occasion when two or more people or things communicate with or react to each other:**

*There's not enough interaction **between** the management and the workers.*

Language games are usually intended to encourage student interaction.

The play follows the interactions of three very different characters.

So what are we actually doing?

Usability
Prototyping
User
Testing
Emotions
Cognition
Authenticity

Topics covered

Cognition

Social interaction

Emotions

Testing in different ways

(+ prototyping)

Analysing tests

Authenticity

Exercise

- In groups of app. 2 persons: 10 minutes + 10 minutes

- Given an example of bad interaction design
  - Give suggestions to improvements

  - Now re-think it completely
  - What is it, you really want?

Exercise

- In groups of app. 2 persons: 10 minutes + 10 minutes

- The coming video is an example of bad interaction design
  - Give suggestions to improvements (10 minutes)

  - Now re-think it completely (10 minutes)
  - What is it, you really want?

User eXperience Design

ex·pe·ri·ence (ĭk-spîr′ē-əns)

n.

1. The apprehension of an object, thought, or emotion through the senses or mind: *a child's first experience of snow.*

Prototyping

Usability

- testing

Exercise

Human augmentation

- A student would like to understand, what the teacher says in class.

- Design something.....

Things/activities/steps to consider:

- Who is the student?
  - So what kind of teacher is it?
- Understand the situation
  - Time frame, course type, amount of students,.....
- Now it is time to get ideas for a solution
- Imagine the new situation
- Make an extremely simple prototype
- Test it

Test in class 15:15

- Let another group test your system and give you feedback

- Don’t show and tell ->let them try it
- Help them understand how to use it
